Security Between Us

MOTIVATING JENNY

Read Me

Security between Us is a modelling workshop that looks at the broader ***context*** in which software development security decisions take place. In it, developers build a physical model of their environment.

Focusing on a single project, pairs of developers explore how security intersects with:

- Technical tools and environments
- Social connections and communications
- How things work now, and how they used to work.

This workshop promotes open conversation about how security factors into everyday situations in software development teams and departments.

Get Started

1. OrganiserInstructions.pdf – how to setup and run the workshop
2. ParticipantInstructions.pdf – a set of guidelines to give participants
3. ModifyingTheWorkshop.pdf – tips for making changes and further reading
4. MotivatingJennyOverview.pdf – information about other packs in the toolkit
