

Constant low drone,
lasts days/weeks in
varying intensity
of volume, like
a rich organ drone
swirling between the
notes of A & F#

Rare and often
short lived, the
weirdest one, a
kind of wind rushing
white noise thing

Most common
& ~~the~~ the oldest
a high ringing,
coming with out
warning that starts
loud & fades away,
more recently it comes
with a pressure like
being on an airplane
& mild effect on
balance.
