Online services always get it right when they judge what I'm interested in

Not all of the things that I follow are equally important to me

I want to be able to tell online services what matters to me most

I don't have enough control over what online services choose for me

I'm happy to have a computer make decisions about what content I should see

Being able to rank or prioritise hashtags and other content appeals to me

**I am happy to put in effort to 'train' the online services in order to see better results**
