

## Security in the Community

MOTIVATING JENNY

### Read Me

**Security in the Community** is a guide that helps developers bolster their security know-how online. Learning security is about more than exercises and check-lists. It is about getting involved - engaging with real problems, and giving and receiving support from other developers.

The pack includes the guide in three versions that provide tips and information in different levels of detail. We suggest you make them available to all the developers in your team, for use:

- When they have five minutes, using the text version;
- As a poster to read in the coffee break; or
- As a video displayed on an open screen.

### Get Started

1. SecurityInTheCommunityText.pdf – Four tips in three minutes
2. SecurityInTheCommunityPoster.pdf – an A4 to print and display
3. SecurityInTheCommunity.mp4 – a video
4. MotivatingJennyOverview.pdf – information about other packs in the toolkit
